

# NIC Release Notes

NIC distributor

NIC agent

This release includes updates for the Distributor and Agent Apps, including:

## Advisor Invites

---

- ◆ Invitation e-mail reminder: an invited user that has not yet clicked an invite link and started the on-boarding process will now get the first reminder when there are 3 days remaining until expiry, and the second reminder when there is only 1 day left until expiry.
- ◆ SSO users coming in from Distributor websites have also been marked as active to prevent sending invites and reminders from the NIC platform.
- ◆ Added a process that can flip the invite status after the invite has expired: when the invitation expires, the user's invitation status gets updated so they can be invited through the app again. The button within the user's contact card gets changed from "Pending" back to "Invite", the user's status in "Invite Users" table updates to "Unsubscribed".

## Insights

---

- ◆ In force policies page filtering: we have applied a fix where wrong policies were included to the Total In Force Policies number. After the change, only active/in force and paid up type of policies are included.
